- City of Stratford
- Town of St. Marys

Project Location

Municipality/Township: _____

Lot: _____ Concession: _____

Workable Acres Farmed: Own: _____ Rent: _____ Total: _____

Please check the sections that you are applying for

Nutrient Management Plans

Note: The nutrient management plan must meet local municipal by-laws and recommendations provided by OMAF. A qualified agriculture consultant (P.Ag., P.Eng. with a current creditation or specialization in the assessment of soils, manure and nutrient management) must complete the plan. It must also be peer reviewed by OMAF.

Estimated cost of project: _____

Estimated project completion date: _____

Wellhead Protection

Note: Proper decommissioning must be done by a licenced contractor.

- Pitless adapter installation
- Sealing annular space around well casing
- Upgrading or replacement of well casing
- Extending well casing up to 40 cm above finished ground level
- Land grading around well

Describe the proposed project, including present wellhead condition:

Note: All works must be completed in compliance with Ontario Regulation 903.

Estimated cost of project: _____

Estimated project completion date: _____

Decommissioning Unused Wells

Note: Proper decommissioning must be done by a licenced contractor. In order to maintain the provincial well water records, a Global Positioning System (GPS) reference will be taken by CWP staff.

Estimated cost of project: _____

Estimated project completion date: _____

Fertilizer, Chemical and Fuel Storage or Handling

- Farm chemical storage buildings
- Chemical mixing/spraying washing structures
- Spill containment for farm fuel storages
- Liquid fertilizer handling facility
- Upgrading existing facilities

Describe the project, including present condition:

Note: All works must satisfy the Canadian Farm Building Code.

Estimated cost of project: _____

Estimated project completion date: _____

Site Plan

Provide a sketch showing existing site features and proposed best management practices. Include farm buildings, and the distance to and location of drain tiles, catchbasins, wetlands, watercourses and wells. Include other information that you feel is important.

A large rectangular area filled with a light gray grid, intended for drawing a site plan. The grid consists of 15 columns and 20 rows of squares. The grid is enclosed by a thick black border.
